AUTOMATIC PUBLIC CONVENIENCES

BRIGADE ORDER OPERATIONS NO. 9

PART 2 AUTOMATIC PUBLIC CONVENIENCES

INTRODUCTION

- 1 Local Authorities are gradually introducing public conveniences which are coin operated and which close automatically, after each use, and self-clean.
- 2 There is a risk of the mechanism becoming jammed and possibly trapping a person inside. This Brigade Order explains the procedure for opening the door in such an emergency.

EMERGENCY OPENING

- 3 In order to open the public door in an emergency, an emergency flap situated in the front section of the roof can be lifted to give access to a pull ring which opens the door.

INSTRUCTIONS

(see diagrams)

- 4 Climb onto the roof of the convenience.
- 5 Open the trap door (above the public area access door).
- 6 Pull the ring to release the door and *at the same time* a second person should open the door.
