		FIRE HELMETS

PART 2 – FIRE HELMETS

PURPOSE

The Fire Helmet is an integral part of the Firefighters Personal Protective Equipment. It is designed to interface with other items of PPE.

The Brigade uses the Gallet F1 helmet, the Gallet F2 helmet and the Cromwell F600 helmet. The Gallet F1 and Cromwell F600 are standard helmets for firefighters with the Gallet F1 being the customary issue to all firefighters and the Cromwell F600 offered as an alternative to those wearers who have difficulty in achieving a satisfactory fit with the Gallet F1. The Gallet F2 is a lightweight helmet and is issued to Aerial Appliance Drivers.

STRATEGIC AIMS AND OBJECTIVES

Strategic Aim 3 “Secure the highest level of safety and welfare for all staff by providing effective supervision, training, equipment and systems of work.”

ROLES, RESPONSIBILITIES AND REVIEW

The **Risk and Safety Manager** is responsible for ensuring this Order is implemented across the Brigade.

Users will be responsible for the day to day operation of the Order.

The **Operational Equipment Officer** will review this order annually in *January* and as and when organisational changes take place.
