

SECTION TWO – DEBRIS GLOVES

INTRODUCTION

Debris gloves are provided as a general purpose handling glove.

STANDARD ISSUE

Six pairs are carried on every appliance.

USE

Debris gloves should be used when handling debris where the degree of thermal protection required is less than that afforded by Firecraft gloves.

CLEANING

The gloves should be washed using a mild hand soap. A stiff bristle brush may be used to help remove stubborn grime.

DRYING

The gloves should be air dried in accordance with the guidelines laid down for Firecraft gloves.

INSPECTION

The gloves should be inspected regularly and replaced as necessary.
