**BRIGADE ORDER
TECHNICAL
NO. 7**

PART 2

**PULLING AND
LIFTING
EQUIPMENT**

PART 2 – PULLING AND LIFTING EQUIPMENT

PURPOSE

Firefighters often have to deal with incidents where access to trapped persons has been restricted due to the affects of a road traffic accident, building collapse or trench collapse.

Before the casualty can be extricated, debris and wreckage must be cleared away and/or stabilised.

This Order describes a selection of versatile equipment which is intended to provide the widest possible range of options to firefighters.

STRATEGIC AIMS AND OBJECTIVES

Strategic Aim 3 “Secure the highest level of safety and welfare for all staff by providing effective supervision, training, equipment and systems of work.”

ROLES, RESPONSIBILITIES AND REVIEW

The **Risk and Safety Manager** is responsible for ensuring this Order is implemented across the Brigade.

All operational personnel will be responsible for the day to day operation of the Order.

The **Risk and Safety Manager and the Operational Equipment Officer** will review this order annually in *July* and as and when organisational changes take place.
