

Corporate Risk Management Summary

Report of the Chief Fire Officer

For further information about this report please contact Rod Hammerton, Chief Fire Officer, on 01743 260201 or Ged Edwards, Planning, Performance and Communications Manager, on 01743 260208.

1 Purpose of Report

This report updates Members on the status of risks on the Corporate Risk Register.

2 Recommendations

The Committee is asked to note the contents of the report.

3 Background

Following risk management training in March 2016, Members requested that the Corporate Risk Register should be reported to the Fire Authority twice a year, with the Audit and Performance Management Committee (APMC) receiving a quarterly report.

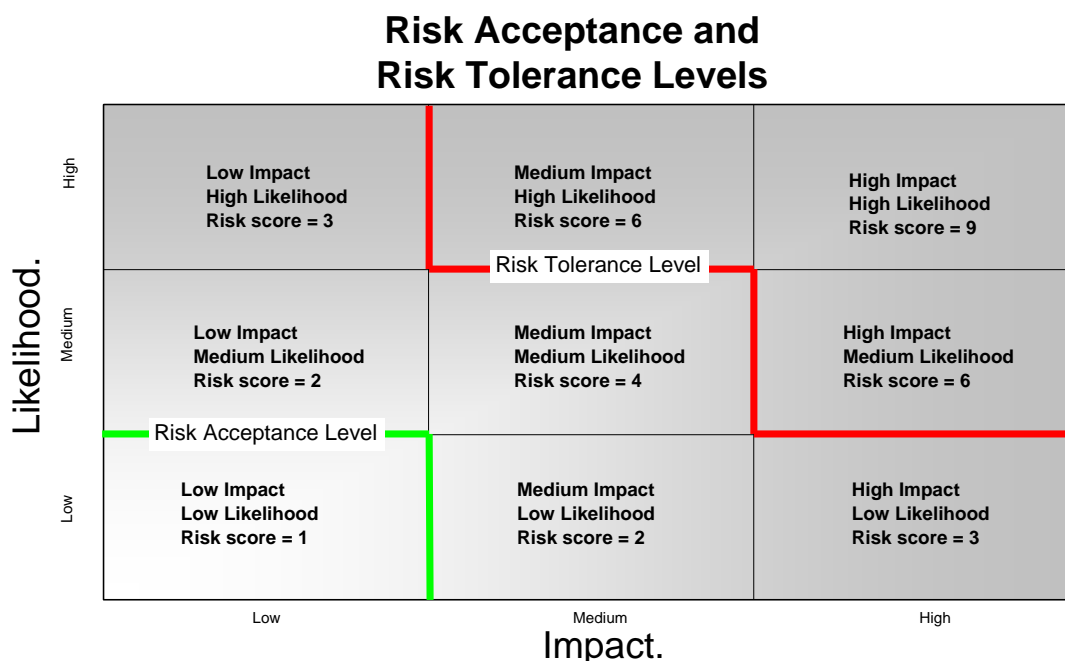

Following discussions with the Risk Member Champion and the Vice Chair of APMC, the format of this report has been varied from previous reports. Appendix A is a summary of the Corporate Risk Register and Appendix B covers all details that are captured about each risk on the register.

4 Risk Acceptance and Tolerance Levels

The purpose of risk management is not to eliminate all risk, but to reduce the risk to a level that the Authority is prepared to tolerate. This will vary depending on the Authority's current level of 'Risk Appetite' and is defined by the Authority setting its 'Risk Tolerance Level'. This level essentially acts as a target, with any risks higher than this level attracting appropriate effort and resources in an effort to reduce it to below this level. This target therefore acts as a management indicator, with greater levels of monitoring being required for those risks above the level, than for those below it.

In addition to the upper level, it is also appropriate to set a lower level target, called the 'Risk Acceptance Level'. Any risks assessed as being lower than this level should attract minimal effort and resources. This helps to ensure that resources are not wasted trying to reduce risks unnecessarily.

The Risk Management Brigade Order reflects the current risk Tolerance and Acceptance level and are shown in the table below.

5 Risk Management Process

The table in Appendix A shows a summary of the current risks on the corporate risk register. Appendix B shows more detailed information on each of the individual risk including: the risk title, the risk owner, a description of that risk, the counter measures that are either being applied or Officers are working to apply, the level of risk without controls, with controls and an assessment of the current level of risk. There is also a narrative column to enable risk owners to comment on the information provided where relevant.

6 Current Position

An update from the Workforce Advisor at the Local Government Association (LGA) has indicated that work concerning the European working time directive legislation is progressing and further information will be sent to all Fire Authorities in due course.

The Finance system cut over has now taken place, however the Business Continuity Support Group will continue to oversee the implementation projects for Payroll, Training and Human Resources systems. The go live date for these systems will take place in January 2019.

The Home Secretary's decision to transfer governance to the Police and Crime Commissioner (PCC) is still on hold following the Fire Authority's decision to pursue a judicial review.

Officers are however actively engaged with the Office of the PCC in preparing for the potential change, and a strategic alliance plan has been developed and consulted upon and is being presented to the Fire and Rescue Authorities for adoption.

The risk raised as a result of notice given by Motorola to withdraw maintenance support of the Integrated Communications Control System (ICCS) has been reduced. Motorola have given assurance that the current system will be maintained until the roll out of the new system has been completed.

A new risk has been added to the register relating to the potential impact on operational staffing levels when the new fitness standards are adopted in April 2019.
